Item No. 213503

GAP OPENER

Attention:

Carefully read all instructions and review the images before installing this product. **Do not** attach anything to the mount face plate until after installing the mount to the dashboard. Doing so makes it more difficult to install the mount to the dash. **Also**, our installation instructions are often printed prior to the last year of a ProClip mount listing. The year listing we show on our web site should be the most accurate listing.

Important

Self-installation instructions and advice are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills, and physical ability required to properly perform an installation. ProClip USA, LLC. shall have no liability for damage or injury resulting from the installation or use of any ProClip or third party products. It is your responsibility to ensure that all products are installed in adherence with local laws and regulations and in such a manner as to allow a vehicle to be operated safely and without distraction. ProClip USA, LLC. product warranties do not cover the installation, removal or reinstallation of any product.

STEP 1 OF 4

Clean the area where the ProClip will attach.

Press the thin end of the enclosed gap opener into the gap between the two upper dash panels, to widen the gap. (See photo for location.)

Remove the cover from the adhesive tape on the ProClip.
NOTE - The adhesive tape cover **MUST** be removed. The tape does not leave any marks or damage the dashboard, and is easy to remove.

STEP 2 OF 4

Place the ProClip in your hand so the ProClip label (sticker) is in an upright position, or if vertically positioned; the P in ProClip is at the top.

Insert the lower S shaped angled edge of the ProClip into the seam between the lower frame of the storage box and the panel around the box frame. Make sure the lower edge of the ProClip stays into the seam and hooks behind the dash panel as you rotate the ProClip upward.

STEP 3 OF 4

Continue to rotate the ProClip upward until the upper J shaped angled edge of the ProClip aligns with the seam next to the gap opener.

STEP 4 OF 4

With a wrench, turn the adjusting nut on the top side of the ProClip to tighten the adjustable upper arm of the ProClip. Turn the adjusting nut until the upper J shaped angled edge of the ProClip inserts under and fastens tightly onto the upper dash panel next to the gap opener. Use an Allen wrench to tighten the set screw on the ProClip adjusting nut to lock the ProClip into place.

Pull out the gap opener.

Returns

All returns must be made within thirty (30) days of the delivery date and include proof of purchase, a copy of your original order, or invoice. No products shipped hereunder may be returned without ProClip USA's prior approval. In order to return a product, the buyer must obtain an RMA number (Return Merchandise Authorization Number). Items returned without a valid RMA number may be rejected. **Items that are open, used, damaged, or returned without all original components may have a restocking fee applied.**
