Overview Image

Attention:

Carefully read all instructions and review the images before installing this product. **Do not** attach anything to the mount face plate until after installing the mount to the dashboard. Doing so makes it more difficult to install the mount to the dash. **Also**, our installation instructions are often printed prior to the last year of a ProClip mount listing. The year listing we show on our web site should be the most accurate listing.

Important

Self-installation instructions and advice are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills, and physical ability required to properly perform an installation. ProClip USA, LLC. shall have no liability for damage or injury resulting from the installation or use of any ProClip or third party products. It is your responsibility to ensure that all products are installed in adherence with local laws and regulations and in such a manner as to allow a vehicle to be operated safely and without distraction. ProClip USA, LLC. product warranties do not cover the installation, removal or reinstallation of any product.

STEP 1 OF 4

Due to the narrow seam/gap in the console sidewall there is a two step operation to get the gap openers in place. See narrow part of picture: Press the thin end of the enclosed gap opener into the gap between the center console edge and the sidewall edge, to widen the gap. See large part of picture: Press the second gap opener into the gap to the right of the first gap opener. Then pull out the first gap opener and press it into the gap to the right of the second gap opener.

STEP 2 OF 4

Place the ProClip in your hand so the ProClip label (sticker) is in an upright position, or if vertically positioned; the P in ProClip is at the top. Place the angled edge on the right side of the ProClip over the console edge.

STEP 3 OF 4

Place your index fingers behind the ProClip. Pull so the ProClip flexes towards you and hook the angled edge into the gap between the two gap openers. Then press firmly towards the left side of the ProClip to make sure the angled edge is all the way into the gap (see insert picture on the lower right of the main picture). Pull out the gap openers.
