STEP 1 OF 4

Install the Right Lip:

Insert the included gap opener into the seam between the outer vent face and the inner vent wall. The gap opener should be about half-way down the vent. This is a very tight seam and you may need to move the gap opener up or down slightly to get it inserted.

Hold the mount with the ProClip sticker on the left. Peel the cover from the double side tape.

STEP 2 OF 4

Install the Right Lip:

Insert the right-hand lip into the seam above the gap opener. Make sure the lip is fully inserted. Hold the mount in place for the next step and remove the gap opener.

STEP 3 OF 4

Install the Left Lip:

Use your fingers to press on the left side of the mount so that it flexes. While the mount is flexed, insert the left-hand lip into the vent until it lines up with the silver trim.

STEP 4 OF 4

The ProClip is in place.
